## Bidder Information Session December 3, 2024

FirstEnergy Ohio Utilities' Competitive Bidding Process for SSO Supply Procurement

Auction Date: January 21, 2025 Delivery Period: June 1, 2025 – May 31, 2027

#### Welcome to this bidder information session for FirstEnergy Ohio Utilities' Competitive Bidding Process (CBP)

- FirstEnergy Ohio Utilities: The Cleveland Electric Illuminating Company, The Toledo Edison Company, and Ohio Edison Company ("Companies" or "FEOU")
- CBP is designed to procure full requirements service for SSO Customers of the Companies ("Standard Service Offer Load" or "SSO Load")
  - Includes load not being served by a Competitive Retail Electric Service ("CRES") Supplier
  - <u>Excludes</u> Percentage of Income Payment Plan ("PIPP") Customers
- Winning bidders will assume responsibilities of a PJM Load Serving Entity ("LSE"), however renewable energy requirements will be procured by, and be the responsibility of, the Companies
- Auction date is January 21, 2025
- Delivery period is June 1, 2025 through May 31, 2027

#### Presentation is being made by representatives from

- CRA International, the independent Auction Manager
- This presentation will be posted to the Auction Information Website

Questions

# 2 ways to submit questions during the presentation – questions will be answered only after the prepared presentation

- Send an email to <u>FEOUAuctionManager@crai.com</u> or
- Use the Zoom Q&A feature to submit your questions
- Attendees will only be able to see their own questions submitted

#### Following the prepared presentation

- Questions will be queued in the order above and answered
- The questions sent via email will be answered first, and the questions on Zoom Q&A will be answered next
- Attendees who use Q&A will remain anonymous during the Q&A session

**Disclaimer** 

The material contained in this presentation is intended to provide only generally descriptive and summary information. The information and material provided on the Auction Information Website and filed with the Commission are controlling. Any conflict between the information conveyed during this bidder information session, and what is provided on the Auction Information Website, is unintentional.

Certain information may be subject to modification and approval by the Commission.

Background

On May 15, 2024, the PUCO approved the Companies' fifth Electricity Security Plan (ESP-V) for a term of 5 years, including continuation of the SSO auction process with modifications.

On June 14, 2024, the Companies filed an Application for Rehearing. The Application for Rehearing was denied by operation of law following the Ohio Supreme Court's decision in *In re Application of Moraine Wind, L.L.C.,* Slip Opinion No. 2024-Ohio-3224.

The Companies filed a Notice of Withdrawal of their ESP-V Application and a Motion to Amend the Companies' fourth Electric Security Plan (ESP-IV) Tariffs and Provisions on October 29, 2024, which are pending before the PUCO. The Companies' motion requests that the PUCO amend ESP-IV to adopt the SSO procurement process approved in ESP-V.

### **Overview**

Communications

**Product overview** 

**Qualification process** 

**Credit provisions** 

**PJM settlement** 

**Bidding format** 

**CBP** calendar

#### Q&As

### Communications

# Central source of information is the Auction Information Website: <u>www.firstenergyCBP.com</u>

- Documents CBP participation documents, load data, etc.
- Calendar
- Results from previous CBP auctions
- News
- FAQ
- Ask submit a question
- About links to background information
- Registration register to receive future notifications

#### **Communications Protocols (available on Information Website)**

- Promote a fair, open, transparent, objective, and non-discriminatory CBP
- Auction Manager is the communication point for prospective bidders
- Information is distributed and disseminated equally and fairly to all prospective bidders

Full requirements service for SSO Customers of the Companies excludes load being served by a CRES Supplier and load associated with PIPP customers but includes:

- Energy
- Capacity
- Market-based transmission services
- Any other LSE service or other service as may be required by PJM to serve the SSO Load of the Companies except those listed in Section 2.3 of the Master SSO Supply Agreement

#### Winning bidders will be responsible at their sole cost and expense for:

- Any changes in PJM products and pricing during the contract term
- Any congestion costs incurred to supply its SSO share
- Remaining a member in good standing of PJM

# Each SSO Supplier shall be responsible and liable to PJM for the performance of its LSE obligations associated with the provisions of SSO Supply

(continued)

#### SSO Suppliers will be obligated under the Master SSO Supply Agreement to

- Deliver full requirements service of the slice of system of the Companies for purposes of meeting SSO Load
- Assume specified LSE obligations for purposes of PJM settlement

#### SSO Suppliers will not be obligated to provide

- Distribution services
- Alternative or renewable energy requirements

#### SSO Load will be divided into identical units called tranches

- Each tranche represents one percent (1%) of the actual hourly energy required for SSO Load for the relevant Delivery Period as well as one percent (1%) of the PJM capacity requirement for the relevant Delivery Period
- Intent is to procure 100 tranches for each delivery period over multiple CBP auctions

(continued)

Table below shows the tentative, nominal MW quantity associated with the energy obligation and the capacity obligation for each tranche based on historical data of all customers with the exception of PIPP customers.

Number of Tranches		Energy O	bligation	Capacity (	Obligation
Per Delivery Period	Size of Tranche (%)	Peak Load Share (MW)	MW-Measure of Tranche	Peak Load Share (MW)	MW-Measure of Tranche
100	1%	10,476	104	10,016	100

The energy obligation quantity is not necessarily indicative of the actual energy quantity to be delivered for each tranche because the amount of actual SSO Load during the Delivery Period will depend upon many factors, including but not limited to customers being served by CRES Suppliers and weather conditions

Bidders are responsible for evaluating the uncertainty associated with supplying a wholesale energy tranche which could vary each hour from the nominal maximum hourly energy for the delivery period shown in the table

The capacity obligation estimate associated with the Peak Load Share quantity to be delivered for each tranche also is shown in the table

These values are provided for reference purposes only and may be updated prior to the auction as explained in the Bidding Rules

The Companies do not represent that each tranche will have the loads shown above or any particular MW value – the actual SSO Load during the Delivery Period will depend upon many factors

**ESP-V** Procurements Schedule

**Minimum and Maximum Starting Prices** 

# Prior to the auction, the Auction Manager will announce the minimum and maximum starting price range for the auctioned product

 As part of the application process, Qualified Bidders submit indicative offers based on the minimum and maximum starting price which will be used to determine the Bidder's initial eligibility in the auction

# The Auction Manager may determine that due to extraordinary events, the minimum starting price or maximum starting price require revision

- If indicative offers have already been received, the Auction Manager will request that the Registered Bidders – or the Qualified Bidders if the Part 2 Application process has not been completed – modify their indicative offer on the basis of the revised minimum starting price and the revised maximum starting price
- Such an event also may require a revision to the schedule for the CBP auction

#### No later than three (3) business days before bidding starts, the Auction Manager will inform Registered Bidders of the starting price for round 1

**Overview** 

There will be a Part 1 Application and a Part 2 Application for the January 2025 auction

#### Part 1 Application: Prospective bidders apply to become Qualified Bidders

- Start Date: Wednesday, December 4, 2024
- Due Date: Tuesday, December 17, 2024, 12:00 noon ET

# Part 2 Application: Each Qualified Bidder provides certifications, its indicative offer, and pre-bid security in order to become a Registered Bidder

- Start Date: Monday, December 23, 2024
- Due Date: Thursday, January 9, 2025, 12:00 noon ET

#### Only Registered Bidders can participate in the bidding

NOTE: Prospective bidders will be able to fill out, submit, and upload their supporting documentation for the Part 1 and Part 2 Applications on-line through the secure Online Application Website. Hardcopies are not required.

Part 1 Application – Due Tuesday, December 17, 2024, 12:00 noon ET

#### Submit an application from a person with the power to bind the bidder and agree to:

- Comply with all rules of the auction
- If they become winning bidders, they will execute the Master SSO Supply Agreement with the Companies

## Show that they either satisfy the three requirements below, or have no existing impediments to them satisfying all the requirements by the start of the supply period

- Transmission Customer of PJM and have executed the required PJM Agreements
- Have PJM E-Accounts necessary to provide SSO Supply
- PJM Market Participant and a Load Serving Entity in PJM

### Agree that if they become winning bidders, they will comply with the creditworthiness requirements set forth in the Master SSO Supply Agreement

#### Certify that if they qualify to participate, they will not:

- Disclose information regarding the list of Qualified Bidders
- Disclose confidential information about Qualified Bidders obtained during the bidding process
- Substitute another entity in their place
- Transfer their rights to another entity
- Otherwise assign their status as Qualified Bidders to another entity

Part 1 Application (continued)

A prospective bidder that has qualified during the Part 1 Application process becomes a Qualified Bidder

Auction Manager will send a list of all Qualified Bidders to relevant parties that have undertaken to maintain the confidentiality of the list of Qualified Bidders – relevant parties that will receive this list of Qualified Bidders are:

- Each Qualified Bidder
- Other parties as necessary to oversee the proper conduct of the auction, including representatives from the Companies, Commission Staff, and the advisor that Commission Staff has retained for this purpose

All parties receiving a list of Qualified Bidders will be subject to the confidentiality requirements as specified in the Bidding Rules and in the Communications Protocols

Part 1 Applicant also must submit financial information and Draft Pre-Bid Letter of Credit

Prospective bidders will be notified by the Auction Manager no later than three (3) business days after the Part 1 Application Due Date whether they succeeded in becoming a Qualified Bidder

Part 1 Application (continued)

#### Part 1 Applications can be submitted online

- The Part 1 Application process opens on Wednesday, December 4, 2024
- The Part 1 Application process closes on Tuesday, December 17, 2024, 12:00 noon ET

**Part 1 Application – New Prospective Bidders** 

Complete the Account Request Form (see example on next slide) and email it to <a href="mailto:FEOUAuctionManager@crai.com">FEOUAuctionManager@crai.com</a>

Account Request Form is available on Information Website <u>www.firstenergycbp.com</u> on Home page under "Forms"

Proposed changes to credit documents – to be emailed to the Auction Manager – are not considered a change to your Part 1 Application itself (but are due by the Part 1 Application Due Date)

#### Part 1 Application – Account Request Form

FirstEnergy Ohio Utilities' Competitive Bidding Process

#### Account Request Form: Request for Part 1 and Part 2 Application Online Account

With access to an Online Account for the Part 1 Application and Part 2 Application process, a prospective bidder will be able to submit and check the status of their Part 1 Application and Part 2 Application as well as upload supporting documentation.

To open an Online Account please fill in the following information:

Co

7.			
8.			
9.			
10.			

Part 2 Application – Due Thursday, January 9, 2025, 12:00 noon ET

Qualified Bidders from the Part 1 Application process submit a Part 2 Application to become Registered Bidders

The Part 2 Application process opens on Monday, December 23, 2024

Due Date: Thursday, January 9, 2025 noon ET

In the Part 2 Application, each Qualified Bidder will make a number of certifications regarding associations to ensure that they are participating independently of other Qualified Bidders and to ensure the confidentiality of information regarding the auction

A Qualified Bidder is associated with another Qualified Bidder if the two bidders have ties that could allow them to act in concert or that could prevent them from competing actively against each other

Part 2 Application (continued)

With its Part 2 Application, a Qualified Bidder will be required to submit an indicative offer – two (2) numbers of tranches for each product in the auction – and to post prebid security sufficient for this indicative offer

- First number is the number of tranches that the Qualified Bidder is willing to serve at the minimum starting price for each product in the auction
- Second number is the number of tranches that the Qualified Bidder is willing to serve at the maximum starting price for each product in the auction
- At the minimum and the maximum starting price, the number of tranches indicated by the Qualified Bidder cannot exceed the Qualified Bidder's credit-based and/or load tranche caps (described later)

#### **Bidder's initial eligibility**

- This is the maximum total number of tranches the Qualified Bidder can bid across all products in round 1 of the auction and it may be subject to a load cap
- Determined by the number of tranches in the Qualified Bidder's indicative offer at the maximum starting prices
- Thus, the indicative offer at the maximum starting prices needs to state the maximum possible number of tranches that the bidder would be ready, willing, and able to serve

# Qualified Bidders will be notified by the Auction Manager no later than three (3) business days after the Part 2 Application Due Date whether they succeeded in becoming a Registered Bidder

**Required Credit and Financial Information** 

For bidder or bidder's Guarantor:

- **Financial statements** (most recently issued SEC Form 10-K, 10-Q, 8-K)
- <u>A statement of rulings or judgments</u> relating to financial status that have had a material impact on financial status
- <u>A debt rating</u> from at least one of the following rating agencies: S&P, Fitch, or Moody's (with supporting documentation)
- <u>Contact information</u> for the Bidder's/Guarantor's credit representative to answer questions on the documentation provided

**Credit-Based and Load Tranche Caps** 

The tranche cap limits the bidder's initial eligibility – i.e., maximum number of tranches the Qualified Bidder is allowed to bid across all products in round 1

# Credit-Based tranche cap is based on the credit rating of the Qualified Bidder or its Guarantor – Qualified Bidder or Guarantor must:

- Be rated by at least one of the following rating agencies: Standard & Poor's Rating Services ("S&P"), Moody's Investors Service, Inc. ("Moody's"), or Fitch, Inc. ("Fitch")
- If a Qualified Bidder that is rated below BB- or Ba3 or is not rated by any of the credit agencies, the credit-based tranche cap is 6 tranches

# Load cap is a percentage of load aggregated for the product for the auction date

Load cap is 80 percent

Load cap = 40 tranches (tranche target = 50 tranches)

- No bidder may bid on and win more tranches than the load cap in the auction
- The load cap is enforced by ensuring that each bidder's initial eligibility does not exceed the load cap in an auction
- No two or more associated bidders may bid on and win more tranches than the load cap

**Pre-Bid Security – 2 Options** 

#### 1) Use Pre-Bid Letter of Credit

- <u>Part 1</u>: Submit a Draft Pre-Bid Letter of Credit (LOC)
- Part 2: Submit an executed Pre-Bid LOC (\$500,000/tranche)

#### 2) Make a cash deposit

- <u>Part 1</u>: Request Wiring Instructions
- <u>Part 2</u>:
  - Submit cash deposit (\$500,000/tranche)
  - Attach a copy of W9 (tax ID) and a copy of banking information on company's letterhead, signed and dated
  - Provide wiring instructions for returning your cash deposit

Master SSO Supply Agreement – Key Elements of Credit Provisions

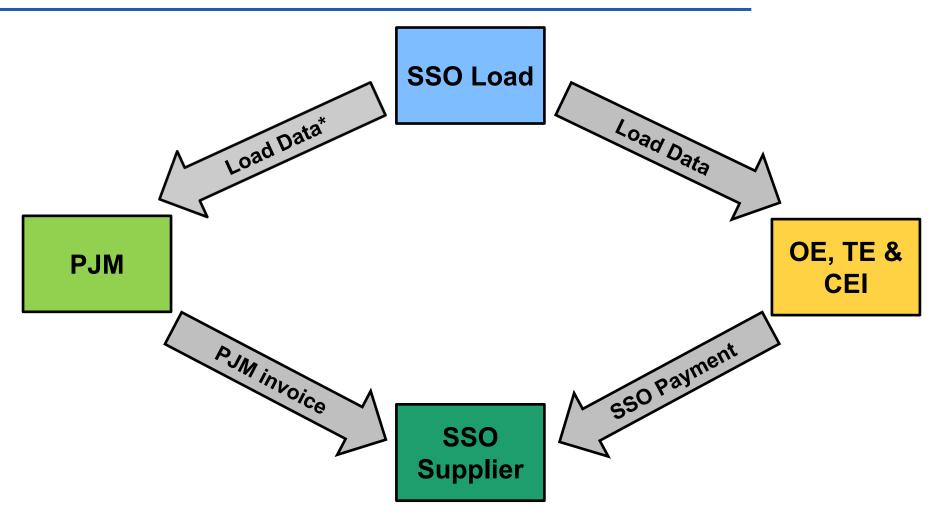

#### Security posted during the term of the SSO Delivery Period will depend upon a creditworthiness evaluation

- Unsecured credit may be granted based on the Supplier's (or its Guarantor's) Tangible Net Worth and credit rating (see Section 6.4 of Master SSO Supply Agreement)
- The Companies reserve the right to apply any unsecured credit limits across associated bidders in cases where multiple associated parties seek to participate as independent bidders
- Total Exposure Amount less any unsecured credit (Margin) must be met with cash or Letter of Credit (Appendix D of Master SSO Supply Agreement)
- Margin could be met with either cash or Letter of Credit

#### Letter of Credit: Appendix D of Master SSO Supply Agreement

#### Guaranty: Appendix E of Master SSO Supply Agreement

**Settlement Landscape** 

\* Load data are developed by the Meter Data Coordinator as designated on the Market Participant's application. The Meter Data Coordinator uses the same PJM settlement data to calculate the SSO Invoice as well as to submit the settlement data to PJM.

The Role of RTO Operations Settlements at FEOU

#### Acts as the Meter Data Coordinator for SSO Suppliers

- Submits load data to PJM for generation of invoices
  - Primary and Secondary data
  - Re-Settlement periods as well
- Splits SSO Load by tranches won in Delivery Period

#### Uses PJM settlement load data to develop the SSO Invoices

- Primary and Secondary data are used for Final Monthly Energy Allocation (FMEA) and Preliminary Monthly Energy Allocation (PMEA)
- Spreadsheet format
- Emailed
- Based on tranches awarded in SSO procurement process

The Role of RTO Operations Settlements at FEOU

An SSO Supplier must create a unique PJM "short name" (or subaccount) for Ohio SSO energy obligations<sup>\*</sup>

Also, Billing Line Item Transfers can occur only if a Supplier has created unique short names for Ohio energy obligations. If these line item transfers do not occur, then the SSO Supplier will be assessed charges by PJM that should be the responsibility of the Companies

Please create new PJM short names and then provide the new short name information to the following FirstEnergy personnel:

Maria Locastro	mlocastro@firstenergycorp.com
Robert Brown	<u>rdbrown@firstenergycorp.com</u>

For RTO settlement questions please contact Robert Brown or Maria Locastro at the emails listed above.

\* Retail load suppliers (CRES) also must create a unique short name for Ohio retail energy obligations

**Reservation Price and Starting Price** 

#### There is a reservation price for each product

- No tranche will be procured at a price that is above the reservation price for the product
- The reservation price will not be disclosed to bidders

#### Starting price for each product = announced price for round 1

- Announced no later than three (3) business days before bidding starts
- No lower than the product's minimum starting price; no higher than its maximum starting price
- Starting price  $\geq$  reservation price

#### **Bidder's eligibility**

- This is the maximum number of tranches the bidder can bid in a round
- Bidder's eligibility for a round is the total number of tranches the bidder bid in the preceding round
- Thus, bidder's eligibility cannot increase during auction only stays the same or declines

#### **Bidders bid using Auction Manager's Bidding Website**

#### The auction will include 2 phases:

- <u>A Clock Phase</u>: During the clock phase the Auction Manager will announce the price prior to each round and each bidder will bid the number of tranches it would supply at that announced price.
- <u>A Sealed-Bid Phase</u>: At some point during the Clock Phase, a Transition Rule based on excess supply may move the auction to the Sealed-Bid Phase. The Sealed-Bid Phase comprises a single round of bidding. Bidders participating in the Sealed-Bid Phase will submit their best and final *prices* for tranches they bid in the next-to-last round of the Clock Phase that they did not bid in the last round of the Clock Phase.

#### Multiple-round, single-product, descending-price clock format

- Each round has specified start and end times
- The price is announced prior to each round the announced price falls round to round
- When a round opens, each bidder submits the number of tranches of the product it is willing to supply at the product's announced price
- After round closes, rules determine whether
  - To continue with next round in the descending-price Clock Phase
  - To transition to Sealed-Bid Phase
  - Auction closing criteria have been met
- Round results are reported prior to the start of next round

**Excess Supply and the Transition to the Sealed-Bid Phase** 

At the end of each round of the Clock Phase, rules determine how to proceed

#### Excess supply = (# of tranches bid) – (tranche target)

- 1) If excess supply = 0: The auction will close and the winning price will equal the last announced price. There will be no Sealed-Bid Phase.
- 2) If excess supply > 0: Price for the product is reduced by a price decrement and the auction will continue with the next round in the Clock Phase.
- 3) If excess supply < 0 and only one bidder reduced the number of tranches it bid: The auction will close with winning tranches comprising tranches bid in the last round (to be paid the announced price in that round) as well as a sufficient number of the reduced tranches by the bidder (to be paid the announced price in the next-to-last round) to meet the tranche target.</p>
- If excess supply < 0 and two or more bidders reduced the number of tranches they bid: The auction will advance to the Sealed-Bid Phase.
- 5) If excess supply < 0 and no bidders reduced the number of tranches they bid: This can occur only in round 1 of the auction. The Auction Manager may consider a tranche target reduction consistent with pre-specified criteria or the auction may close.</p>

**The Sealed-Bid Phase** 

Bidders who reduced their tranches bid from the next-to-last round to the last round of the Clock Phase will submit their best and final prices for those reduced tranches

#### The sealed-bid round bids

- 1) Bidders participating in the sealed-bid round will specify a price for each tranche of sealed-bid round eligibility. A bidder may bid a separate price for each tranche.
- 2) For each tranche bid in the sealed-bid round, the bidder may not specify a price above the lowest announced price that the bidder bid on the tranche during the Clock Phase. This price is the announced price that was in effect in the next-to-last round of the Clock Phase.

**Default Bid** 

#### Default bid for a bidder: The Clock Phase

- If bidder entered round with positive eligibility but fails to submit a confirmed bid in the round, then a default bid will be submitted on behalf of the bidder
- The default bid will be zero (0) tranches because the announced price decreased from the prior round
- A bidder with zero (0) tranches bid will not be able to submit any more bids in the Clock Phase

#### Default bid for a bidder: The Sealed-Bid Phase

- If bidder is required to bid in the Sealed-Bid Phase of the auction and fails to submit a confirmed bid, then a default bid will be submitted on behalf of the bidder
- The default bid for each tranche that needs to be bid in the sealed-bid round will be the announced price that was in effect in the next-to-last round of the Clock Phase

**Discretion to Reduce Tranche Target** 

#### **Discretion to reduce tranche targets (# tranches to procure)**

- If there is insufficient supply bid for the tranches to ensure competitive bidding, Auction Manager may reduce the tranche targets
  - The criteria that could lead to such a reduction will be determined prior to the auction but will not be announced
  - Once certain pre-specified criteria related to excess supply and related to the reservation prices have been met, the discretion to reduce the tranche targets will be eliminated and there will be no reduction in the tranche targets
  - Any exercise of this discretion would be more likely in the earlier rounds of the auction
- If the Auction Manager reduces tranche targets for the auction, bidders will be informed of the revised tranche targets

### **Bidding Format** Illustrative Example

Illustrative Bidding in the Clock Phase												
		Announced	Number of Tranches Bid									
Round	Tranche Target	Price (\$/MWh)	BidderA	BidderB	BidderC	BidderD	Total					
1	100	\$75.00	34	55	21	72	182					
2	100	\$70.00	30	55	15	50	150					
3	100	\$66.00	20	52	10	45	127					
4	100	\$62.00	15	48	0	44	107					
5	100	\$59.50	0									

Excess supply < 0 in round 5, so that is the last round of the Clock Phase.

In round 5, only 90 tranches of supply were bid against 100 tranches being procured – all 90 tranches are winning tranches.

10 of the 17 tranches to be bid in the sealed-bid round will be winning.

**BidderA**: Bid 15 tranches at \$62.00/MWh in round 4 and 0 tranches at \$59.50/MWh in round 5. Because BidderA reduced the tranches it bid by 15 tranches, it is required to bid 15 tranches in the Sealed-Bid Phase at prices no higher than \$62.00/MWh.

**BidderB**: Bid 48 tranches in rounds 4 and 5. Because BidderB did not reduce the tranches it bid, it does not participate in the Sealed-Bid Phase. BidderB wins 48 tranches at \$59.50/MWh.

**BidderC**: Bid 0 tranches at \$62.00/MWh in round 4 and is not eligible to participate in the Sealed-Bid Phase and does not win any tranches.

**BidderD**: Bid 44 tranches at \$62.00/MWh in round 4 and 42 tranches at \$59.50/MWh in round 5. BidderD wins 42 tranches at \$59.50/MWh and is required to bid 2 tranches in the Sealed-Bid Phase at prices no higher than \$62.00/MWh.

Winning Tranches, Bidders, and Prices

#### Case 1: If auction concluded in Clock Phase with Excess Supply = 0

- There will be no Sealed-Bid Phase and winning bidders will be determined based on the Clock Phase alone
- Winning tranches are the tranches bid in the last round of the Clock Phase
- Winning bidders are the bidders who bid those tranches
- Price to be paid for winning tranches will be the announced price for the last round of the Clock Phase

# Case 2: If auction concluded in Clock Phase with Excess Supply < 0 <u>AND</u> only one bidder reduced the # of tranches it bid

- There will be no Sealed-Bid Phase and winning bidders will be determined based on the Clock Phase alone
- All tranches bid in the last round of the Clock Phase are winning tranches
  - They are paid the announced price in that round
- Some of the tranches reduced by the bidder are winning tranches
  - Enough so that # of winning tranches in total = tranche target
  - The reduced tranches that are winning tranches are paid the announced price in the next-to-last round of the Clock Phase (the last time the bidder bid the tranches)

Winning Tranches, Bidders, and Prices

#### Case 3: If auction proceeded to Sealed-Bid Phase

- All tranches bid in the last round of the Clock Phase are winning tranches
  - They are paid the announced price in that round
- Winning tranches bid in the Sealed-Bid Phase will be determined based on their rank order
  - Lowest-priced tranches are selected first until the tranche target is fully subscribed
  - If a tie-breaker is needed, random numbers are assigned to tranches bid at the same price, and those tranches with the lowest random numbers are selected as winning tranches
  - Winning tranches in the Sealed-Bid Phase are paid the price they were bid at in the Sealed-Bid Phase

**Close of the Auction** 

# Shortly after the last round of the auction, results are confirmed by the Auction Manager, then:

- Auction Manager provides to the FirstEnergy Ohio Utilities, the PUCO, and the PUCO advisor the identity of winning bidders, the number of tranches won by each winning bidder, and the prices for the tranches won
- Auction Manager notifies:
  - Each winning bidder of how many tranches the bidder has won and at what prices
  - Each unsuccessful bidder that the bidder has not won any tranches
- The PUCO will determine if there has been a violation of the CBP bidding rules in such a manner as to invalidate the auction based upon an assessment from CRA and the PUCO's advisor

# FirstEnergy Ohio Utilities and winning bidders will execute the Master SSO Supply Agreement

#### **Contingency Plan of the FirstEnergy Ohio Utilities**

- See Section 11 of the Bidding Rules
  - If fewer tranches than the tranche target are procured in the auction
  - If a winning bidder defaults prior to or during the SSO Delivery Period

**Technical Difficulties During the Auction** 

Unforeseen technical difficulties may happen during an online auction

Pursuant to the auction rules, if a technical difficulty occurs during the auction, depending on the circumstances the Auction Manager will:

- Inform all the bidders as soon as possible, by phone and/or Auction Manager Message page on the Bidding Website
- Accept bids using the Backup Bidding Fax Number
- In case a bidder is unable to submit its bid via facsimile, it is recommended that the bidder call CRA's Help Desk to submit a bid over the phone
- Extend the duration of bidding round(s), extend the time between bidding round(s), or otherwise pause the auction

### **Timeline for Next SSO CBP Auction**

Timeline for January 2025 SSO CBP Auction								
Activity	Date							
Zoom Information Session	Tuesday, December 3, 2024							
Part 1 Applications can be submitted	Wednesday, December 4, 2024							
CRA announces tranche target and tranche size (% and MW)	Wednesday, December 4, 2024							
Deadline to submit Part 1 Applications	Tuesday, December 17, 2024							
CRA announces minimum and maximum starting prices	Monday, December 23, 2024							
Part 2 Applications can be submitted	Monday, December 23, 2024							
CRA announces any update to the tranche size (MW)	Thursday, January 2, 2025							
Deadline to submit Part 2 Applications	Thursday, January 9, 2025							
Bidder User Manuals Distributed	Tuesday, January 14, 2025							
Mock Auction for Registered Bidders	Thursday, January 16, 2025							
CRA announces starting prices to Registered Bidders	Thursday, January 16, 2025							
Auction for Registered Bidders (auction date subject to PUCO approval)	Tuesday, January 21, 2025							
Expected Commission Decision due second day after conclusion of auction (tentative)	Wednesday, January 22, 2025							
Supplier Master Agreements Signed (tentative)	Friday, January 24, 2025							
Power Flow	Sunday, June 1, 2025							

#### Following the prepared presentation

- Questions received and queued during the prepared presentation will be answered in the following order:
  - Email
  - Zoom Q&A
- The questions sent via email will be answered first, and the questions on Zoom Q&A will be answered next
- Attendees who use Q&A will remain anonymous during the Q&A session

# Q&As raised during this bidder information session will be posted on the Information Website

#### Thank you for your interest in the CBP
